

POSTER TITLES

Talla V., Dinca V., Friberg M., Wiklund C., Vila R., Niclas Backström (p.24)

Uppsala University

Speciation genomics and chromosome rearrangements in cryptic butterfly species

Felix Baudry* (p.25)

University of Toronto

*Degeneration of the Y chromosome of *Rumex hastatulus*: a search for signs of adaptation*

Max Bernstein*, Matthew Rockman (p.26)

New York University

*Fine-scale recombination rate variation on the *C. elegans* X chromosome*

Ryan R. Bracewell*, Jeffery M. Good (p.27)

University of Montana

The evolution of sex-specific specialization on neo-XY chromosomes

Alan Brelsford, Jessica Purcell (p.28)

University of Lausanne and University of California, Riverside

*A non-recombining chromosome is associated with social organization in three major lineages of *Formica* ants*

Emily J. Brown, Doris Bachtrog (p. 29)

University of California, Berkeley

*Sex-specific aging in *Drosophila*: a role for the Y chromosome?*

Petr Bureš, Pavel Veselý, František Zedek (p. 30)

Masaryk University

Flow cytometric detection of holocentric chromosomes in plants

Jennifer N. Cech*, Catherine L. Peichel (p. 31)

Fred Hutchinson Cancer Research Center

Mechanism of centromere inactivation on a neo-Y chromosome in threespine stickleback fish

Guillaume Charron*, Jean-Baptiste Leducq, Lou Nielly-Thibault, Chris Eberlein, Christian Landry (p. 32)

Université Laval

Introgression of rearranged chromosomes leads to reproductive isolation and species formation

Fredy Colorado*, Peter Adler, Luis Garcia, Marta Bueno, Nubia Matta, Ligia Moncada (p. 33)

Universidad Nacional de Colombia

*A powerful tool to delimit and characterize black flies: polytene chromosome rearrangements analysis in *Simulium (Psilopelmia)* species of Colombia*

Matthew A. Conte*, Frances E. Clark, Thomas D. Kocher (p. 34)

University of Maryland

B chromosome dynamics and sequence evolution in African cichlid fish

Frances E. Clark, Matthew A. Conte, Irani A. Ferreira, Thomas D. Kocher (p. 35)

University of Maryland

Quantification of repetitive sequence from a sex-associated B chromosome in Lake Malawi cichlid fish

John Davey, Mathieu Chouteau, Fraser Simpson, Kanchon Dasmahapatra, James Mallet, Simon Martin, Chris Jiggins (p. 36)

University of Cambridge

*The 21 chromosomes of *Heliconius melpomene**

Anne-Marie Dion-Côté, Radka Symonová, F. Lamaze, Petr Ráb, Louis Bernatchez (p. 37)

Université Laval

Chromosomal polymorphism and reproductive isolation in natural nascent species pairs

Xinxian Deng, Wenxiu Ma, Vijay Ramani, Andrew Hill, Fan Yang, Ferhat Ay, Joel B. Berletch, Carl Anthony Blau, Jay Shendure, Zhijun Duan, William S. Noble, Christine M. Disteche (p. 38)

University of Washington

Bipartite structure of the inactive mouse X chromosome

Christopher E. Ellison, Nitin Phadnis, Doris Bachtrog (p. 39)

University of California, Berkeley

Drosophila Y chromosomes preserve a history of genetic conflict

William Gammerdinger*, Matthew Conte, Enoch Acquah, Reade Roberts, Thomas Kocher (p. 40)

University of Maryland

*Structure and decay of a proto-Y region in *Tilapia*, *Oreochromis niloticus**

Ryan C. Garrick, Louis G. Zachos (p. 41)

University of Mississippi

*Evolutionary history of chromosomal races within the *Cryptocercus punctulatus* complex (Insecta: Blattodea), a dead wood specialist from the Southern Appalachian mountains*

Alex Harkess*, Francesco Mercati, Francesco Sunseri, Agostino Falavigna, Jim Leebens-Mack (p. 42)

University of Georgia

Identifying sex determination genes on the young asparagus Y

Lucas Hemmer*, Justin Blumenstiel (p. 43)

University of Kansas

*Molecular evolutionary analyses reveals positive selection in the rapidly-evolving synaptonemal complex in the *Drosophila* genus*

Christina Hodson, Steve Perlman (p. 44)

University of Victoria

Exploring ecological consequences of a selfish sex ratio distorting chromosome in a booklouse

Yanzhu Ji, J. Andrew DeWoody (p. 45)

Purdue University

Genomic landscape of long terminal repeat retrotransposons (LTR-RTs) and solo LTRs as shaped by ectopic recombination in chicken and zebra finch

Takeshi Kawakami, Carina F. Mugal, Paulina B. Bolivar, Alexander Suh, Reto Burri, Alexander Nater, Marty Kardos, Linnea Smeds, Hans Ellegren (p. 46)

Uppsala University

Recombination hotspots of Ficedula flycatchers

Melissa Keinath*, Vladimir Timoshevskiy, Panagiotis Tsonis, S. Randal Voss, Jeremiah Smith (p. 47)

University of Kentucky

Characterization of a large vertebrate genome using shotgun and laser capture chromosome sequencing

Genevieve M. Kozak, Crista B. Wadsworth, Shoshanna C. Kahne, Steven M. Bogdanowicz, Gabriel Golczer, Brad S. Coates, Richard G. Harrison, Erik B. Dopman (p. 48)

Tufts University

Evidence for balancing selection and chromosomal rearrangements during ecological speciation in Ostrinia moths

Rebecca Pace, Leos G. Kral (p. 49)

University of West Georgia

Evolution of centromeric proteins in percid fishes

Erica L. Larson, Matthew D. Dean, Jeffrey M. Good (p. 50)

University of Montana

Sex chromosomes, gene expression and speciation

André Marques*, Tiago Ribeiro, Pavel Neumann, Jiri Macas, Petr Novák, Veit Schubert, Marco Pellino, Jörg Fuchs, Wei Ma, Markus Kuhlmann, Ronny Brandt, André L. L. Vanzela, Hana Simkova, Andrea Pedrosa-Harand, Andreas Houben (p. 51)

Federal University of Pernambuco, Brazil

Holocentromeres are defined by genome-wide centromere-specific repeat arrays interspersing the gene-containing chromatin

Keteryne Rodrigues da Silva, Diogo Cavalcanti Cabral-de-Mello, Patricia Pasquali Parise-Maltempi (p. 52)

UNESP Universidade Estadual Paulista

Satellite DNA in the Ancistrus genome revealed through next generation sequencing

Gazoni T, Strüssmann C, Lyra ML, Haddad CFB, Parise-Maltempi PP (p. 53)

UNESP Universidade Estadual Paulista

Revalidation of Leptodactylus brevipes Cope, 1887 (Amphibia, Anura, Leptodactylidae) based in cytogenetic and molecular evidences

Kathleen E. Pieper*, Kelly A. Dyer (p. 54)

University of Georgia

Evidence for gene flow but ineffective selection on a selfish X-chromosome in Drosophila neotestacea

Ornjira Prakhongcheep*, Kazumi Matsubara, Ponsuda Moonin, Surin Peyachoknagul, Chizuko Nishida, Tariq Ezaz, Yoichi Matsuda, Kornorn Srikulnath (p. 55)

Kasetsart University

Evolutionary history of VSAREP satellite DNA family in Varanus (Varanidae Squamata)

Kornsorn Srikulnath, Yoshinobu Uno, Chizuko Nishida, Hidetoshi Ota, Yoichi Matsuda (p. 56)

Kasetsart University

Gekkota retains the highly conserved linkage homology with other squamate reptiles that have many microchromosomes

Nicholas Stewart*, Bryant McAllister (p. 57)

University of Iowa

*Analysis of meiotic drive in reshaping chromosome structure in the *Drosophila virilis* subgroup*

Aorarat Suntronpong*, Panupon Twilprawat, Ornjira Prakhongcheep, Surin Peyachoknagul, Suthasinee Somyong, Kornsorn Srikulnath (p. 58)

Kasetsart University

*Cytogenetic characterization of repetitive elements in Asian swamp eel (*Monopterus albus*)*

Jitendra Thakur, Paul B. Talbert, Steven Henikoff (p. 59)

Fred Hutchinson Cancer Research Center

Interactions of inner kinetochore proteins with fission yeast regional centromeres

Alexander Gotowski, Kathryn Walters-Conte (p. 60)

American University

A genomic comparison of SINE composition in the tiger and domestic cat

Ryan Waples*, Lisa Seeb, James Seeb (p. 61)

University of Washington

*Linkage mapping with paralogs exposes regions of residual tetrasomic inheritance in chum salmon (*Oncorhynchus keta*)*

Laura Weingartner*, Lynda Delph (p. 62)

Indiana University

*Neo-sex chromosome inheritance in *Silene* hybrids*

Michael A. White, James R. Urton, Shaugnessy R. McCann, Jane Grimwood, Jeremy Schmutz, Richard M. Myers, David M. Kingsley, Catherine L. Peichel (p. 63)

University of Georgia

Sequencing the threespine stickleback Y chromosome: a vertebrate model system for sex chromosome evolution

František Zedek, Petr Bureš (p. 64)

Masaryk University

CenH3 evolution reflects meiotic symmetry and monocentric/holokinetic chromosomal structure as predicted by the centromere drive model

*AGA student travel awardee
